INVOICE

Services	qty	unit price	amount
electrician went out and they told customer that the ac is what is blowing the breaker Inspected the system and found a shorted compressor. Jordan is going out tomorrow to give the customer quotes.	1.0	$0.00	$0.00

A "shorted compressor" (specifically shorted-to-ground) means the internal electrical motor windings have broken down, causing electricity to bypass its path and arc to the metal casing.
This trips circuit breakers instantly, prevents the unit from starting, and usually requires a full compressor or system replacement.

Causes: Overheating, age, mechanical failures, electrical surges, or lighting strikes

Subtotal	$0.00
Total Tax	$0.00
New Tax Rate (10%)	$0.00
Job Total	**$0.00**
Amount Due	**$0.00**
