RE:	Insured:	MPW Surfacing Holdings LLC
	Claim Number:	85-00746467
	LSG Matter Number:	426600.4049-00
	Date of Loss:	November 5, 2024

Dear Ms. Thybault,

Thank you for choosing Loss Solutions Group as your equipment loss consultant. This report provides an analysis of the above-referenced claim.

Assignment:

Loss Solutions Group was contacted by Ms. Victoria Thybault of Hanover Insurance. The scope of this assignment was to address the extent of damage, repair / replacement costs, and (any) salvage value associated with the insured's Flow Mach 200 Integrated Waterjet porcelain cutting CNC machine, stemming from a transit incident on November 5, 2024.

Findings and Analysis:

Loss Solutions Group contacted the insured, Mr. Nicholas Jacobo of MPW Surfacing Holdings LLC (281-816-4925), to discuss our role in reviewing the claim. Mr. Jacobo described the company's operations, which include installing showers and floors, and explained that the CNC machine is used for cutting intricate designs into porcelain. He reported that the machine was damaged during transit to Albuquerque, New Mexico, where it was exposed to water, resulting in damage to internal electrical components, the pump, and the cutting head. Consequently, the installation vendor could not proceed and issued quote QU158699-2 for the required repairs prior to final installation and startup.

Loss Solutions Group contacted the vendor, Flow International Corporation, and spoke with Ms. Kay Payne (800-526-4810). She explained the parts listed in the repair quote and the damages necessitating them. Ms. Payne noted that the quote includes estimates, as engineers are located

© 2022 by Loss Solutions Group, LLC. All rights reserved.

nationwide. Upon approval, the nearest engineer would be assigned, which could adjust the airfare cost in line item #11 accordingly.

Scope of Damage

Loss Solutions Group submits that the insured's Flow Mach 200 Integrated Waterjet porcelain cutting CNC machine sustained significant damage from water exposure during a transit incident on November 5, 2024.

Age & Condition

The insured provided the original order invoice, confirming the machine's build date. The equipment was approximately four (4) years old and in average condition at the time of the incident.

Reparability

After reviewing the provided documentation and discussing the damage with the vendor, Loss Solutions Group concludes that the proposed repairs are appropriate and necessary to address the incident-related damage.

Cost Analysis

Loss Solutions Group assessed the proposed costs by cross-referencing with alternative vendors, drawing on historical data for similar repairs, evaluating comparable equipment pricing, and consulting directly with the involved vendor to verify reasonableness. Below is a breakdown of the associated costs.

FLOW INTERNATIONAL CORPORATION (800-526-4810) QUOTE # QU158699-2

Loss Solutions Group reviewed the quote totaling $16,319.05 for parts and labor to repair the Flow Mach 200 machine.

The quote includes a replacement ten inch (10") water filter housing, two (2) water filter elements, a maintenance kit for the high-pressure Hyplex Prime pump, five (5) 3.6-volt lithium-ion batteries, a plunger nut, a check valve body rebuild kit, two (2) universal on/off valve kits, a vacuum assist maintenance kit, and a specialized mixing tube. These components are necessary for the repair, and the pricing is fair and reasonable.

The labor costs cover diagnostics, repairs, travel, four (4) nights of lodging, five (5) days of rental car use, and five (5) days of per diem. These amounts are fair and reasonable for the scope of work.

Note: Costs may vary slightly based on the assigned technician's location, with potential adjustments to airfare in line item #11 after approval and engineer selection.

© 2022 by Loss Solutions Group, LLC. All rights reserved.

RCV

Loss Solutions Group recommends $16,319.05 as the fair and reasonable RCV to restore the insured to pre-loss condition. Supporting cost research is provided herein and a detailed pricing breakdown is available in the attached spreadsheet.

ACV

Loss Solutions Group calculates an actual cash value (ACV) of $14,924.35, applying linear depreciation to materials only, based on an estimated twenty (20) year life expectancy.

Salvage

Loss Solutions Group determines that there is little to no salvage value associated with this incident.

Summary:

Loss Solutions Group's findings are based on available information, reviewed documentation, interviews, research, experience, historical references, training, and education.

1. The insured, MPW Surfacing Holdings LLC, reported damage to their Flow Mach 200 Integrated Waterjet porcelain cutting CNC machine from a transit incident on November 5, 2024. A total amount of $16,319.05 was presented to us.

2. The insured provided the original order invoice, confirming the machine was approximately four (4) years old and in average condition at the time of the incident.

3. After reviewing the provided documentation and discussing the damage with the vendor, Loss Solutions Group concludes that the proposed repairs are appropriate and necessary to address the incident-related damage.

4. Loss Solutions Group recommends $16,319.05 (RCV) as fair and reasonable to restore the insured to pre-loss condition. Supporting cost research is provided herein and a detailed pricing breakdown is available in the attached spreadsheet.

    a. Costs may vary slightly based on the assigned technician's location, with potential adjustments to airfare in line item #11 after approval and engineer selection.

5. Loss Solutions Group calculates an ACV of $14,924.35 based on linear depreciation of materials only.

6. Loss Solutions Group determines that there is little to no salvage value associated with this incident.

Good Morning,

Please see revised 60% invoice.

You have a ship date schedule for 03/15/2021 and Installation date set for 03/29/2021.

Please send the 60% payment today so we will receive it by 03/15/2021.

We want to make sure we stay on schedule.

If you have any questions, please let me know.

Thank you,

Strohnna Gregg
