Ms. Nancy Campos
Travelers Insurance
PO Box 430
Buffalo, NY 14240-0430

RE:	Insured:	Green Carriers Express Inc
	Claimant:	Applied Membranes
	Claim Number:	FYZ9527
	LSG Matter Number:	787200.12193-01
	Date of Loss:	TBD

Dear Ms. Campos,

Thank you for choosing Loss Solutions Group as your equipment loss consultant. This report serves to provide an analysis of the above-referenced claim.

Assignment:

Loss Solutions Group was contacted by Ms. Nancy Campos of Travelers Insurance. The scope of this assignment was to address the extent of damage, salvage value, and repair/replacement costs associated with two (2) dark green tanks of unspecified capacity reportedly damaged related to a transit event.

Findings and Analysis:

Loss Solutions Group contacted the insured, Mr. Esem Eric with Green Carriers Express Inc. (224-391-8593), to advise him of our involvement in reviewing this claimed event. During our conversation, Mr. Eric stated that in the Bill of Lading, the driver acknowledged responsibility for an incident in which a tank fell from his trailer during transport, causing significant damage. The first tank reportedly sustained holes in its structure, rendering it unusable, while the second tank reportedly suffered damage to its valves, compromising its functionality. Additionally, a pallet associated with one (1) of the tanks was reportedly missing, most likely destroyed during the claimed incident.

Loss Solutions Group contacted the broker of this claim, Echo Global Logistics, and spoke with Ms. Christine Nader to discuss the claimed event and the costs presented. During our conversation, Ms. Nader reported that their client (the tank owner) has been unresponsive to requests for additional

© 2022 by Loss Solutions Group, LLC. All rights reserved.

details regarding the tanks, fittings, labor, and travel, as they have already received payment for the claim. She further noted that the limited information and documentation initially provided represents the entirety of the records available from their side. We queried Ms. Nader in follow ups and her efforts in gathering additional information from the equipment owner were unsuccessful. As such, we utilized all information received in an effort to measure this claim.

On September 8, 2025, this claim was reopened with the broker, Echo Global Logistics, providing a new document from Applied Membranes, Inc. (Invoice #661417). To validate the invoice, we attempted to contact Ms. Christine Nader at Echo Global Logistics but we were unable to reach her. Her voicemail stated that she was out of the office until August 25, 2025 (a date over two (2) weeks prior), and she did not return our calls.

Loss Solutions Group contacted the new parts vendor, Applied Membranes, Inc. (760-727-3711), and spoke with Mr. Paul Cyr regarding invoice #661417. Mr. Cyr confirmed the new invoice costs were for one (1) large 460 volt pump, and three (3) plastic PVC valves. Note: There was no labor in this invoice for the labor required to install the three (3) valves.

The insured, Green Carriers Express, submitted a claim as it relates to two (2) tanks reportedly damaged in transit. The claim presented, by way of documentation received, totals $19,400.00.

Scope of Damage

Loss Solutions Group submits that the broker reportedly sustained significant damages to their two (2), dark green tanks of unspecified capacity reportedly damaged related to a transit event.

Age & Condition

The broker did not know the specifics of the equipment or condition at the time of the claimed event. Using the photographs provided we believe that the tanks were in new and unused condition at the time of the claimed event.

Reparability

Loss Solutions Group has reviewed the information provided, and we have discussed the damage with vendors familiar with the equipment. We submit that the proposed replacement path is warranted due to the damages we see in the photos provided to us.

Cost Analysis

Loss Solutions Group has researched the costs using alternate vendor resources, historical references, similar equipment costs, and vendor experience. Furthermore, we have discussed pricing with a tank manufacturer to gather more insight. The following is a breakdown of the associated costs.

© 2022 by Loss Solutions Group, LLC. All rights reserved.

ECHO GLOBAL LOGISTICS QUOTE PROVIDED TO US IN AN EMAIL FROM CHRISTINE NADER TOTALING $19,400.00

Loss Solutions Group has reviewed the amount of $19,400.00 for the replacement of the broker's two (2), dark green water tanks.

Included in the cost is an amount for two (2), dark green water tanks of unspecified capacity, shipping costs to transport these new tanks, fittings for the new tanks, shipping costs for the fittings, labor costs for engineering, additional labor for AMI employees, onsite labor, travel time at an overtime rate, and lastly travel expenses such as a hotel, airport, rental cars, and meals. Despite our repeated efforts to gather detail and support, the majority of the presented costs lack sufficient substantiation and are not adequately supported. In an absence of supporting documentation, Loss Solutions Group performed research in determining the cost to return/replace the tanks shown in the photographs to a pre-loss condition.

APPLIED MEMBRANES INC. (760-727-3711) INVOICE # 661417

Loss Solutions Group has reviewed the amount of $67,620.77 for additional replacement parts related to the claimed event.

This total includes one (1) 1.5" True Union style PVC ball valve, two (2) 2" True Union style PVC ball valves, and one (1) large 460-volt pump, which is not related to this claimed event. We assert that the three (3) ball valves were necessary to complete the repair, and the associated costs are fair and reasonable.

We have updated our costs slightly to reflect the new prices for the three (3) new ball valves and have added additional labor required to install the valves at a rate of $50.00 per valve (this cost was provided to us by National Tank Outlet).

<u>Alternate Vendor Contacts</u>

Further research in establishing valuation utilizing third party vendors is further discussed below:

National Tank Outlet (888-686-8265)

Loss Solutions Group contacted National Tank Outlet and spoke with Ms. Carly Clarkson in the parts department to gather further information. Given our research, we estimated the capacity of each tank to be 1,000 gallons. We provided photographs of the tanks to Ms. Clarkson who validated this as the probable capacity. We discussed the price of tanks and their standard fitting accompaniment. Ms. Clarkson explained that their tanks come with two (2) fittings pre-installed on their tanks (a 1.5 inch national pipe thread bulkhead fitting on the top, and a two inch (2") national pipe thread bulkhead fitting on the bottom) and that for an additional two inch (2") national pipe thread bulkhead fittings (as reflected in the claim photos) to be installed on the bottom of a tank it would cost $50.00 in labor in addition to the parts cost of $60.00 each.

© 2022 by Loss Solutions Group, LLC. All rights reserved.

RCV

The claim presented totaled $19,400.00.

Included herein is a claim summary spreadsheet that provides for the claim and our analysis. Each of the major claimed items is further discussed herein.

Reference #1 reflects the tanks claimed at $3,100.00 or $1,550.00 each. Our research/vendor query yielded a purchase cost of $1,380.00 each for a total of $2,760.00.

Reference #2 reflects a shipping/tax estimate of $1,500.00. Given the dedicated flatbed nature of transport, and estimated taxes, we submit this to be within the realm of reason.

Reference #3 reflects the claimed cost of the fittings to be $2,000.00. With the new invoice provided by Applied Membranes Inc. (Invoice # 661417), we were able to obtain the exact cost of the three (3) PVC valves that were reportedly needed in this claim.

Reference #4 was a claimed $200.00 for shipping the fittings. As the fittings are calculated in a previous line item, additional shipping is not recommended herein.

Reference #5 represents engineer hours totaling $2,000.00. The equipment owner did not provide any additional information to support engineering time, and the photographs do not support such. Accordingly, no additional engineering hours or cost are calculated herein.

Reference #6 through #9 represent claimed labor ($1,200.00), travel ($3,000.00), on site labor ($2,400.00), and overtime travel time ($4,000.00). The equipment owner has not supported these claimed costs, nor do the photographs suggest these additional costs will be incurred.

Loss Solutions Group submits an amount of $4,785.56 (RCV) as being fair and reasonable to return the subject property to a pre-loss condition via replacement and configuration.

A difference was noted between the claimed cost ($19,400.00) and Loss Solutions Group's researched cost totaling $14,614.44. The difference is associated with claimed costs (engineering, labor, materials, travel costs), not supported by the equipment owner or the photographs provided.

Should the equipment owner provide additional information supporting the aforementioned costs, Loss Solutions Group can review such for reasonableness and applicability to the subject claim.

ACV

Loss Solutions Group has not completed an actual cash value (ACV) analysis for this claimed event as the equipment appeared to be in a new and unused condition.

© 2022 by Loss Solutions Group, LLC. All rights reserved.

Salvage

Loss Solutions Group submits that there is little to no salvage value associated with this claimed event.

Summary:

Loss Solutions Group's findings herein are based upon all information that was available at the time of this writing. The opinions are based upon reviewed documentation, interviews, research, experience, historical references, training and education.

1. The broker, Echo Global Logistics, claimed that two (2) dark green water tanks were reportedly damaged related to a transit event. A claimed amount of $19,400.00 was presented.

2. In review of this matter, Loss Solutions Group contacted the broker, who queried the equipment owner. No additional supporting documentation was received. Absent such, we further performed independent research and valuation.

3. Loss Solutions Group reviewed the provided information, and we have discussed the damages with vendors that sell and service the subject equipment. We submit that the proposed replacement path is warranted due to the damages seen in the photographs provided to us.

4. Loss Solutions Group submits an amount of $4,785.56 (RCV) as being fair and reasonable to return the broker to a pre-loss condition. A further breakdown of the pricing is available in the attached spreadsheet.

    a. A difference was noted between the claimed cost ($19,400.00) and Loss Solutions Group's researched cost totaling $14,614.44. The difference is associated with claimed costs (engineering, labor, materials, travel costs), not supported by the equipment owner or the photographs provided.

5. Loss Solutions Group has not completed an ACV analysis for this claimed event as the equipment appeared to be in a new and unused condition.

6. Loss Solutions Group submits that there is little to no salvage value associated with this claimed event.

Hello again,

Here is what I just received, I'm sure you will have additional questions/requests but wanted to send over to you for review:

Below is a breakdown of estimated costs. Due to the complexity of customization for these tanks, we need to travel to Indiana to make the required modifications. All the piping connections need to be precisely aligned with the skids that were delivered to the customer with the original tanks.

Expense	Material cost	shipping/tax	total
tanks	3100	1500	4600
fittings	2000	200	2200
engineering (8 hours)	2000		2000
labor @ ami (2 employees - 8 hrs each)	1200		1200
Travel (airfare, hotel, rental cars, meals)	3000		3000
On site labor (2 employees – 12 hrs each)	1800		2400
Travel time @ OT rate (16 hours each)	4000		4000
			$19,400.00
