Ms. Brandi Whitehead
Travelers Insurance
P.O. Box 430
Buffalo, NY 14240-0430

RE:	Insured:	Barbour County Commission
	Claim Number:	DFZ9811
	LSG Matter Number:	787200.12473-00
	Date of Loss:	August 22, 2025

Dear Ms. Whitehead,

Thank you for choosing Loss Solutions Group as your equipment loss consultant. This report serves to provide an analysis of the above-referenced claim.

Assignment:

Loss Solutions Group was contacted by Ms. Brandi Whitehead of Travelers Insurance. The scope of this assignment was to address the cause of loss, extent of damage, salvage value, and repair / replacement costs associated with the insured's damaged truck scale reportedly related to a lightning strike event on August 22, 2025.

Findings and Analysis:

Loss Solutions Group contacted the insured, Ms. Renay Hurst and Mr. Turner Lee with Barbour County Commission (334-784-2750), to advise them of our involvement in reviewing this claimed event. During our conversation with Mr. Lee, he explained that a large storm on August 22, 2025, resulted in a lightning strike near their truck scale. Mr. Lee noted he had limited knowledge about the scale and requested we gather further details from their vendor, Elite Scales and Systems.

Loss Solutions Group contacted the insured's truck scale repair vendor, Elite Scales and Systems (229-881-0527), and spoke with Mr. John Clark to discuss the claimed event, findings, and necessary repairs. Mr. Clark reported that the insured's Rice Lake Weighing Systems truck scale, approximately ten (10) years old and in average condition, was damaged by a lightning strike likely hitting a light pole approximately thirty feet (30') above the scale. The strike caused the scale to sustain burn damage to its wiring, load cells, junction box, and touchscreen computer, necessitating

their replacement with components similar in like kind and quality, along with minor additional wiring. Mr. Clark provided a cost breakdown of the parts needed.

Scope of Damage

Loss Solutions Group submits that the insured reportedly sustained significant damage to their truck scale during a lightning strike event on August 22, 2025.

Age & Condition

The vendor reported that the affected equipment looked to be around ten (10) years old and in average condition at the time of the claimed event.

Cause of Loss

Loss Solutions Group submits that the damages are consistent with a lightning strike event. We have confirmed the presence of heavy storm cells and lightning strikes in the insured's geographical area on the reported date of loss by using the NOAA severe weather data inventory website and www.wunderground.com.

Reparability

Loss Solutions Group has reviewed the information provided, and we have discussed the damage with the vendor involved. We submit that the already completed repair path was warranted due to the damage reportedly sustained during the claimed event.

Cost Analysis

Loss Solutions Group has researched the costs using alternate vendor resources, historical references, similar equipment costs, and vendor experience and we have discussed the pricing with the vendor involved. The following is a breakdown of the associated costs.

ELITE SCALES AND SYSTEMS, LLC (229-881-0527) INVOICE # 1114

Loss Solutions Group has reviewed the amount of $17,989.90 for the repairs to the insured's truck scale.

Included in the cost is an amount for eight (8) Rice Lake brand (75,000 lb. capacity) double ended beam load cells, one (1) eight 8-input channel weatherproofed loadcell box made by Transcell, one (1) Rike Lake brand universal indicator for load cells (1280), one (1) Rice Lake brand single analog output device scale card (1280), and some miscellaneous items like wire and cleaning materials. We submit these components are required to complete the repair and most of the costs are fair and reasonable.

Loss Solutions Group has reviewed the labor costs for the vendor to diagnose the damage and to perform the repairs. We submit that these amounts are fair and reasonable to complete the scope of work as presented to us.

Note: A difference was noted between the claim cost and Loss Solutions Group's researched cost, totaling $3,086.62. The first discrepancy, $428.57, relates to an excessive markup on line item #4 in Elite Scales and Systems' invoice for an 8-channel junction box, a critical component for the Rice Lake Weighing Systems truck scale. Our research verified the parts cost on Rice Lake's website, applying a standard thirty percent (30%) markup on materials, which was significantly lower than the invoiced amount. The second discrepancy, $2,451.75, pertains to shipping and handling costs. By replicating the order on ScalesPlus.com and selecting the same overnight/next-day air shipping option, we confirmed a lower cost compared to the vendor's quoted amount, accounting for the remaining difference.

RCV

Loss Solutions Group submits an amount of $14,903.28 (RCV) as being fair and reasonable to return the insured to a pre-loss condition. A further breakdown of the pricing is available in the attached spreadsheet.

ACV

Loss Solutions Group submits an actual cash value (ACV) amount of $10,660.92 based on linear age depreciation of the materials only. We estimate the average life expectancy of the equipment to be around thirty (30) years.

Salvage

Loss Solutions Group submits that there is little to no salvage value associated with this claimed event.

Summary:

Loss Solutions Group's findings herein are based upon all information that was available at the time of this writing. The opinions are based upon reviewed documentation, interviews, research, experience, historical references, training and education.

1. The insured, Barbour County Commission, claimed that their truck scale was reportedly damaged by a lightning strike event. A total amount of $17,989.90 was presented.

2. The vendor reported that the affected equipment looked to be around ten (10) years old and in average condition at the time of the claimed event.

3. Loss Solutions Group submits that the damage is consistent with a lightning strike event. We have confirmed the presence of heavy storm cells and lightning strikes in the insured's

geographical area on the reported date of loss by using the NOAA severe weather data inventory website and www.wunderground.com.

4. Loss Solutions Group has reviewed the provided information and we have discussed the damage with the vendor involved. We submit that the already completed repair path was warranted due to the damage reportedly sustained during the claimed event.

5. Loss Solutions Group submits an amount of $14,903.28 (RCV) as being fair and reasonable to return the insured to a pre-loss condition.

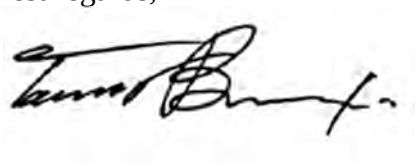
    a. A difference was noted between the claim cost and Loss Solutions Group's researched cost totaling $3,086.62 associated with excessive markup and shipping costs.

6. Loss Solutions Group submits an ACV amount of $10,660.92 based on linear age depreciation of the materials only. We estimate the average life expectancy of the equipment to be around thirty (30) years

7. Loss Solutions Group submits that there is little to no salvage value associated with this claimed event.

If you have any questions or if you need any additional information, please feel free to contact Tanner Beuret at (866) 899-8756 ext. 755, or via email at tbeuret@losssolutionsgroup.com. Team Leader Nick Ramos can be reached at (866) 899-8756 ext. 724, or via email at nramos@losssolutionsgroup.com.

Best regards,



Tanner Beuret
